Innovation Fund (INNOVFUND)

Application Form

Administrative Forms (Part A)
Technical Description (Part B)

(INNOVFUND Standard)

Version 5.0
01 December 2025

Disclaimer
This document is aimed at informing applicants for EU funding. It serves only as an example. The actual web forms and templates are provided in the Funding & Tenders Portal Submission System (and may contain certain differences). The applications (including annexes and supporting documents) must be prepared and submitted online via the Portal.

IMPORTANT NOTICE

What is the Application Form?

The Application Form is the template for EU grants applications; it must be submitted via the EU Funding & Tenders Portal before the call deadline.

The Form consists of 2 parts:

- Part A contains structured administrative information
- Part B is a narrative technical description of the project.

Part A is generated by the IT system. It is based on the information which you enter into the Portal Submission System screens.

Part B needs to be uploaded as PDF (+ annexes) in the Submission System. The templates to use are available there.

How to prepare and submit it?

The Application Form must be prepared by the consortium and submitted by a representative). Once submitted, you will receive a confirmation.

Character and **page limits**:

- Part B page limit normally **70** pages (unless otherwise provided in the Call document)
- annexes and supporting documents do not count towards the page limit
- minimum font size — Arial 9 points
- page size: A4
- margins (top, bottom, left and right): at least 15 mm (not including headers & footers).

Please abide by the formatting rules. They are NOT a target! Keep your text as concise as possible. Do not use hyperlinks to show information that is an essential part of your application.

⚠ If you attempt to upload an application that exceeds the specified limit, you will receive an automatic warning asking you to shorten and re-upload your application. For applications that are not shortened, the excess pages will be made invisible and thus disregarded by the evaluators.

⚠ **Please do NOT delete any instructions in the document. The overall page limit has been raised to ensure equal treatment of all applicants.**

⚠ This document is tagged. Be careful not to delete the tags; they are needed for the processing.

Example, not to be completed

ADMINISTRATIVE FORMS (PART A)

Part A of the Application Form must be filled out directly in the Portal Submission System screens.

Example, not to be completed

Call:
()

Topic:

Type of Action:
()

Proposal number:

Proposal acronym:

Type of Model Grant Agreement:

Table of contents

Section	Title	Action
1	General information	
2	Participants	
3	Budget	
4	Other questions	

Example, not to be completed

How to fill in the forms

The administrative forms must be filled in for each proposal using the templates available in the submission system. Some data fields in the administrative forms are pre-filled based on the steps in the submission wizard.

Proposal ID

Acronym

1 - General information

Field(s) marked * are mandatory to fill.

Topic	Type of Action
Call	Type of Model Grant Agreement

Acronym

Proposal title *Max 200 characters (with spaces). Must be understandable for non-specialists in your field.*

Note that for technical reasons, the following characters are not accepted in the Proposal Title and will be removed: < > " &

Duration in months *Estimated duration of the project in full months.*

Fixed keyword 1 Add

Free keywords *Enter any words you think give extra detail of the scope of your proposal (max 200 characters with spaces).*

Abstract

Remaining characters 2000

Has this proposal (or a very similar one) been submitted in the past 2 years in response to a call for proposals under any EU programme, including the current call? ◯ Yes ◯ No

Please give the proposal reference or contract number.	
Previously submitted proposals should be with either 6 or 9 digits.	Remove

Example, not to be completed

Proposal ID

Acronym

Declarations

Field(s) marked * are mandatory to fill.

1) We declare to have the explicit consent of all applicants on their participation and on the content of this proposal. * ☐

2) We confirm that the information contained in this proposal is correct and complete and that none of the project activities have started before the proposal was submitted (unless explicitly authorised in the call conditions). * ☐

3) We declare:
- to be fully compliant with the eligibility criteria set out in the call
- not to be subject to any exclusion grounds under the EU Financial Regulation 2018/1046
- to have the financial and operational capacity to carry out the proposed project. * ☐

4) We acknowledge that all communication will be made through the Funding & Tenders Portal electronic exchange system and that access and use of this system is subject to the Funding & Tenders Portal Terms and Conditions. * ☐

5) We have read, understood and accepted the Funding & Tenders Portal Terms & Conditions and Privacy Statement that set out the conditions of use of the Portal and the scope, purposes, retention periods, etc. for the processing of personal data of all data subjects whose data we communicate for the purpose of the application, evaluation, award and subsequent management of our grant, prizes and contracts (including financial transactions and audits). * ☐

6) For Lump Sum Grants with a detailed budget table: We understand and accept that EU lump sum grants must be reliable proxies for the actual costs of a project and confirm that the detailed budget for the proposal has been established in accordance with our usual cost accounting practices and in compliance with the basic eligibility conditions for EU actual cost grants (see AGA — Annotated Grant Agreement, art 6) and exclude costs that are ineligible under the Programme. Purchases and subcontracting costs must be done taking into account best value for money and must be free of conflict of interest. ☐

The coordinator is only responsible for the information relating to their own organization. Each applicant remains responsible for the information declared for their organization. If the proposal is retained for EU funding, they will all be required to sign a declaration of honour.

False statements or incorrect information may lead to administrative sanctions under the EU Financial Regulation.

4 - Other questions

In which Member State(s) and/or associated countries will the project be implemented?	

GHG Emission

Absolute GHG emission avoidance (in tCO2e) 0

Result of the GHG emission avoidance calculation. Explanation is provided in application form part B question 2.1

Relative GHG emission avoidance (as a %) 0.00

Result of the GHG emission avoidance calculation. Explanation is provided in application form part B question 2.2

Cost efficiency

Cost efficiency ratio 0.00

Result of the calculation of the cost efficiency ratio. Explanation is provided in application form part B question 6

Example, not to be completed

Validation result

Show Error

The red 'Show Error' button indicates an error due to a missing or incorrect value related to the call eligibility criteria. The submission of the proposal **will be blocked** unless that specific field is corrected!

Show Warning

The yellow 'Show Warning' button indicates a warning due to a missing or incorrect value related to the call eligibility criteria. The submission of the proposal **will not be blocked (**proposal will be submitted with the missing or incorrect value).

PROJECT SUMMARY

Project summary
See Abstract (Application Form Part A).

#§PRJ-SUM-PS§# #@REL-EVA-RE@# #@PRJ-OBJ-PO@#

0. PROJECT AND APPLICANTS

Background and objectives *Describe the background and rationale of the project as well as its specific objectives.*
Insert text

Consortium: beneficiaries and other participants *Brief presentation of the applicant(s) (including any affiliated entities involved in the action) outlining areas of overall and project-specific expertise, number of employees, founding year, geographical locations. Explain why the applicant is the most suitable for implementing the project.* *Describe the relationship between these participants in the project framework.*
Insert text

Technical characteristics and scope *Outline the technical characteristics and scope of the project.* *Include information on:* – *project location and site* – *technology (and why this has been chosen over alternatives)* – *expected source of key inputs and feedstock* – *expected output in terms of volume of main product(s)*
Insert text

Example, not to be completed

Technology scope and the chosen technological solution *Describe in detail the technology/solution applied, and expected impacts of the technology and processes associated with the plant, with reference to the category, sector and product proposed.* *Describe the technology construction, operation and maintenance plan, including operation assumptions and sensitivities. The description should also cover safety, reliability, technical performance and relevant standards.* *Describe the critical interfaces between the different technical components and how interface issues are handled.*
Insert text

#§PRJ-OBJ-PO§# #§REL-EVA-RE§# #@IMP-ACT-IA@#

1. DEGREE OF INNOVATION

1.1 Innovation in relation to the state of the art

State-of-the-art *Describe the state-of-the-art of the solution(s) the project aims to demonstrate.* *Cover the characteristics of the commercially available process or service that is most similar to the proposed one (commercial state-of-the-art), the already demonstrated characteristics of the proposed technological solution at the highest technological readiness level (technological state-of-the-art) and, where relevant, the innovative elements already demonstrated/used in other Innovation Fund projects (Innovation Fund Project Portfolio Dashboard).* *This should focus on the European, rather than national level (or, for NZT GENERAL-SSP topic, on the European or national level).*
Insert text

Innovation beyond state-of-the-art *Describe how the project (technologies/products/services/processes/business models) goes beyond both the commercial and technological state-of-the-art, referring to key performance data evidenced in the feasibility study annex, covering at least:* – *plant design* – *operating approach* – *construction* – *performance/quality* – *reliability and availability* – *maintenance* – *economics.* *Describe how the project (technologies/products/services/processes/business models) goes beyond incremental innovation, referring to key performance data evidenced in the feasibility study annex and covering at least:* – *expected increases in technology readiness level, system readiness level and/or commercial readiness level* – *the technological and economical barriers to be overcome in the realisation of the project.* *See examples in Annex 1 of the Call document.* *Explain why the proposed scale is the most appropriate to reach the objectives of the action.*
Insert text

2. GHG EMISSION AVOIDANCE POTENTIAL

Example, not to be completed

2.1 Absolute GHG emission avoidance

Absolute GHG emission avoidance

Provide the potential absolute GHG emission avoidance (in tCO2) during the 10 years after the project's entry into operation using the Guidance on the GHG emission avoidance methodology.

Briefly explain how the calculation was made, in particular:

- *assumptions for the reference scenario*
- *assumptions for the project scenario*
- *any deviations from the GHG emission methodology and justification.*

Support the claims with:

- *detailed calculations using the GHG emission calculator template. Complete all sheets of the calculator.*

Please note that the key elements of the monitoring plan must be described by completing the 'data traceability' sections in the 'reference emissions', 'project emissions', 'conversion factors', 'assumptions', and 'CC credit' sheets.

The result of the calculation must also be included in Part C and in the cost efficiency calculation (part of the financial information file). Please ensure the values provided are consistent.

Insert text

2.2 Relative GHG emission avoidance

Relative GHG emission avoidance

Provide the potential for relative GHG emission avoidance during the 10 years after entry into operation using the Guidance on the GHG emission avoidance methodology.

The result of the calculation must also be included in Part C. Please ensure the values provided are consistent.

Insert text

2.3 Minimum requirements

Compliance with DNSH TSC criteria for the environmental objective 'climate change mitigation'

Explain how compliance with the 'do no significant harm' technical screening criteria (TSC) set out in Annex II to Delegated Regulations 2021/2139 and/or 2023/2486 will be ensured for the environmental objective 'climate change mitigation' and provide an outline of the plan how these criteria will be fulfilled (see Annex 4 of the Call document.

Note:

Where relevant TSCs exist for an economic activity carried out by the project, you must demonstrate that the project meets the relevant quantitative emission limits as well as all other requirements set by the applicable TSC. This may include the need to develop and present in this box additional calculations (not included in the GHG emission avoidance methodology and calculators).

Compliance with DNSH TSC criteria other than 'climate change mitigation' must be described in section 4.1 below.

Insert text

ETS benchmark emissions

For projects producing products with an EU ETS benchmark, calculate the process emissions after implementation of the project per unit of product (including any credit for carbon capture and storage or utilisation, calculated

Example, not to be completed

following the Guidance on the GHG emission avoidance methodology) and compare this with the equivalent EU ETS benchmark(s) applicable at the time of the application[1] and confirm that the project emissions are lower than the EU ETS benchmark emissions.
Insert text

Sustainability of biomass *For projects using biomass feedstocks, confirm that the biomass used will at least meet the sustainability requirements of the Renewable Energy Directive 2018/2021. The biomass feedstock must either be listed in Part A of Annex IX of the Directive or be certified as low indirect land use change (ILUC)-risk as defined by Commission Delegated Regulation (EU) 2019/807[2].* *For a commitment to be considered credible, provide evidence of an agreement in principle to source the feedstock from one or more producers who are already certified low ILUC-risk, or evidence of an agreement in principle to source the feedstock from one or more producers who have a clear plan to apply for low ILUC-risk certification.* *Explain how sustainability will be ensured.*
Insert text

#§IMP-ACT-IA§# #@QUA-LIT-QL@# #@MAT-URI-MU@#

3. PROJECT MATURITY

3.1 Technical maturity

Technical maturity — overview *Provide in the sections below a detailed description of the project's technical maturity, in particular evidence on the degree of technology readiness of the project and the technical feasibility of delivering the expected project outputs within its operational environment, and of the possible technical risks and related mitigation measures. Cover the current state of project development, building on relevant information or documents.* *Attach:* – *feasibility study annex (mandatory)* – *due diligence reports (if any).*

Technical feasibility
Provide a summary of the following information provided in the feasibility study annex:
– *project description, including:*
  – *block flow diagrams (if applicable)*
  – *technical and operational requirements*
  – *for maritime sector projects: the description of the existing vessel(s) (if applicable) and details on the operational area, shipbuilding location and servicing network*
– *technical maturity, including:*
  – *assumptions used for operational characteristics*
  – *technology readiness level*

Example, not to be completed

[1] Commission Implementing Regulation (EU) 2021/447 of 12 March 2021 determining revised benchmark values for free allocation of emission allowances for the period from 2021 to 2025 pursuant to Article 10a(2) of Directive 2003/87/EC of the European Parliament and of the Council (OJ L 87, 15.3.2021, p. 29).

[2] If the biomass is claimed to come from land with low indirect land use change (ILUC)-risk, the applicant should provide evidence of an agreement in principle to source from one or more producers who are already certified low ILUC-risk, or else provide evidence of an agreement in principle to source one or more producers who have a clear plan to apply for low ILUC-risk certification.

- *process flow diagram(s)*
- *schematic (preliminary) layout(s) and design(s) (including capacities)*
- *mass and energy balances (including before and after the project, if applicable)*
- *volume of the final product(s)*
- *technical assumptions and figures used for the estimation of the GHG emissions avoidance.*

Insert text and refer to the relevant text of the proposal annexes/supporting documents

Due diligence reports (if any)

Describe relevant main conclusions of technical due diligence reports (if any).

Insert text and refer to the relevant text of the proposal annexes/supporting documents

3.2 Financial maturity

Financial maturity — overview

This section should provide a detailed overview of the financial maturity of the project, focusing on the robustness of the business plan, financing structure and the commitments of the project funders (lenders and shareholders).

Attach:

- *detailed budget table/relevant costs calculator ('financial information file') (mandatory)*
- *business plan annex (mandatory)*
- *detailed financial model (mandatory)*
- *project shareholders financial resources (mandatory)*
- *support to project – project funding support documentation (mandatory)*
- *terms of supply – project contract terms documentation (mandatory)*
- *due diligence reports (if any).*

Project business plan

Provide a summary of the following information provided in the business plan annex:

- *business proposition (product or business concept, targeted market and market potential, commercialisation strategy and market uptake, competitive landscape)*
- *copy the table with the overview of main parameters underpinning the projections for revenues, CAPEX and OPEX*
- *overview of project counterparties and strategy to secure contracts.*

Insert text and refer to the relevant text of the proposal annexes/supporting documents

Detailed cash flow projections and project profitability

Provide a summary of the following information provided in the business plan annex:

- *expected project profitability before and after the requested Innovation Fund grant, including a description of the WACC calculation*
- *main results of the sensitivity analysis.*

Example, not to be completed

Insert text and refer to the relevant text of the proposal annexes/supporting documents

Financing plan

Provide a summary of the following information provided in the business plan annex:

- *breakdown and description of funding sources and uses*
- *project financing structure and debt terms (if relevant)*
- *allocation of Innovation Fund grant and any other public funding.*

Insert text and refer to the relevant text of the proposal annexes/supporting documents

Project funders and investors commitment

Provide a summary of the following information provided in the business plan annex:

- *financing parties and their respective funding contribution*
- *degree of advancement in securing funding sources*
- *conditions for final investment decision and milestones to achieve the targeted financial close date.*

Insert text and refer to the relevant text of the proposal annexes/supporting documents

#@CON-SOR-CS@# #@PRJ-MGT-PM@#

3.3 Operational maturity

Operational maturity — overview

In the sections below, provide a detailed description of the operational maturity of the project, demonstrating that the proposed plan for implementing the project is sufficiently developed, comprehensive and realistic.

Attach:

- *feasibility study annex (mandatory)*
- *due diligence reports (if any), e.g. legal due diligence on intellectual property*
- *permits, licences, authorisations (if any).*

Project implementation plan

Describe the implementation planning of the project and key milestones, deliverables and work plan for project development, construction and roll out, and envisaged permitting procedures.

Provide the timeline which must cover the period of the project implementation starting from the signature of the grant up to the end of the monitoring and reporting period and include inter alia the status of project development, the steps concluded so far (e.g. FEED study, initial permits, etc.), the planned date for the final investment decision, start of construction, commissioning and testing, entry into operation.

The timeline should be illustrated in the Gantt chart required in section 9.2.

Provide information on the following aspects:

- *strategy to reach the milestones of financial close and entry into operation as well as the intermediate milestones*
- *planned timing of project activities and milestones and how it ensures meeting the project milestones (e.g. sufficient time reserve for procurement and delivery of major capital components, commissioning and appropriate ramp-up period of reduced output in the initial operation of the project)*
- *strategy for regular operation of the proposed technology during the monitoring and reporting period (e.g. maintenance, down times for revisions, operational capacities, quality assurance/quality control)*

Note: *The implementation plan must be consistent with the work packages, milestones and deliverables described in*

Example, not to be completed

section 9.2.

Applicants are expected to implement the construction works without delay and complete the construction of the project within a reasonable timeframe relative to market standards.

Insert text and refer to relevant sections of the proposal annexes/supporting documents

Due diligence reports (if any)

Describe relevant main conclusions of operational due diligence reports (if any; e.g. legal due diligence on intellectual property, market studies).

Insert text and refer to the relevant text of the proposal annexes/supporting documents

Permits, rights, licences and regulatory procedures

Provide a summary of the following information provided in the project description section of the feasibility study annex:

- *intellectual property rights or licence and other relevant regulatory procedures*
- *relevant permitting processes needed (including permits related to environmental impacts), permits obtained and still needed and the plan for obtaining them. Include a timeline indicating the relevant permit application dates, expected reception dates and measures planned to ensure timely granting*
- *degree of public acceptance of the technology and the project and the steps to be taken to ensure public acceptance*
- *main environmental impacts expected throughout the project life-cycle (from construction to operation to decommissioning), and the mitigation measures. Explain when the environmental studies, assessments and modelling will take place.*

Insert text and refer to relevant sections of the proposal annexes/supporting documents

Project management team and project organisation

Describe the project management team and the project organisation, including:

- *project management team:*
  - *project team, including key qualifications and track records of the staff responsible for project implementation (see also participant information)*
  - *ability to operate without interruption if a key individual leaves*
  - *sufficient coverage of all required skills (such as technical expertise, technology commercialisation, business management, financial management and environmental management)*
  - *need for additional outside resources.*
- *project organisation:*
  - *project management structure*
  - *governance, responsibilities and decision-making mechanisms and processes within the consortium*
  - *evidence that the applicant`s management and sponsors are committed to implementing the project*
  - *quality management and health and safety processes and how they are expected to meet the best industry practice.*

Please make reference to the project diagram provided below.

Insert text and refer to relevant sections of the proposal annexes/supporting documents

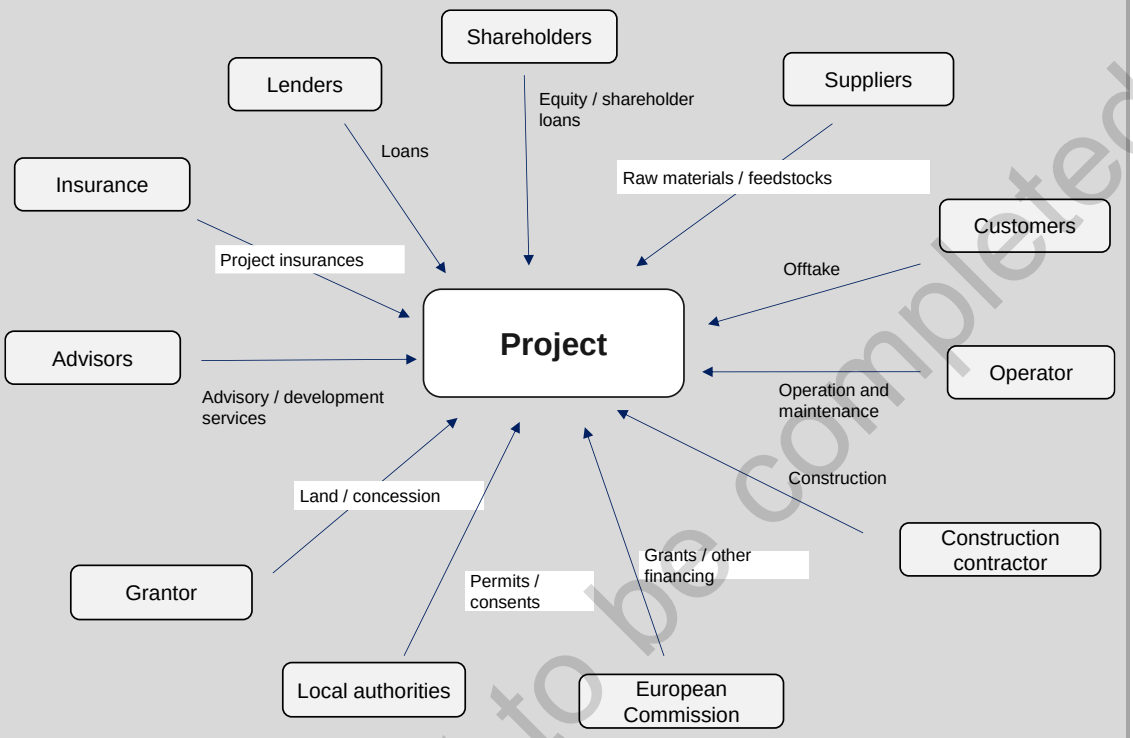
Example, not to be completed

Project diagram

Copy the table provided in the business plan with the project diagram (the example below is only an illustrative example and should be deleted when inserting the project specific diagram).

In case a special purpose vehicle is created for the implementation of the project, please specify in the diagram.

Please specify as much as possible the legal and contractual relationships between the main project stakeholders and contractual parties, also including the coordinator and participants mentioned in Application Form Part A.



Insert text

#§CON-SOR-CS§# #§PRJ-MGT-PM§# #@RSK-MGT-RM@#

3.4 Risk management

Critical risks and risk management strategy
See business plan annex and feasibility study annex.

#§RSK-MGT-RM§# #§MAT-URI-MU§# #§QUA-LIT-QL§# #@IMP-ACT-IA@#

4. REPLICABILITY

4.1 Replicability

Replicability in terms of efficiency gains and multiple environmental impacts

Describe how the project will contribute to efficiency gains and multiple environmental impacts, as described in section 9 of the Call document.

Insert text

Example, not to be completed

Compliance with DNSH TSC criteria for environmental objectives other than 'climate change mitigation' *Explain how compliance with the 'do no significant harm' technical screening criteria (TSC) set out in Annex II to Delegated Regulations 2021/2139 and/or 2023/2486 will be ensured for the environmental objectives other than 'climate change mitigation' and provide an outline of the plan how these criteria will be fulfilled (see Annex 4 of the Call document.* ***Note:*** *Compliance with the objective 'climate change mitigation' must be described in section 2.3 above.*
Insert text

Contribution to Europe's industrial leadership and competitiveness *Describe how the project will contribute to Europe's industrial leadership and competitiveness, as described in section 9 of the Call document.* *For maritime sector projects, describe the contribution of the project in terms of the European added value, as described in the Call document (Glossary).*
Insert text

#@COM-DIS-VIS-CDV@#

4.2 Knowledge sharing — Communication, dissemination and visibility

Knowledge-sharing — Communication, dissemination and visibility of funding *Outline the activities, content, tools, channels and target groups for knowledge-sharing that go beyond the mandatory knowledge-sharing requirements (i.e. reporting and participation in knowledge-sharing events organised by the granting authority; see knowledge-sharing report available on the EU Funding & Tenders Portal Reference Documents for minimum requirements).* *These can include but are not limited to: participation and organisation of technical and scientific events, trainings, lectures, participation in work groups and discussion forums, organisation of site visits, construction of a visitors centre, etc.* *Describe how the visibility of EU funding will be ensured.* ***Note:*** *For successful projects, a detailed knowledge sharing plan will have to be provided later on, as deliverable (see section 10 of the Call document).*
Insert text and refer to the relevant text of the proposal annexes/supporting documents

#§COM-DIS-VIS-CDV§# #§IMP-ACT-IA§# #@FIN-MGT-FM@#

5. COST EFFICIENCY

5.1 Relevant costs and cost efficiency ratio

Relevant costs and cost efficiency ratio *Provide a calculation of cost efficiency ratio: (requested Innovation Fund grant + any additional public support reflected in the financial model / absolute GHG emission avoidance during the first 10 years of operation [EUR / t CO2-eq]).* *Attach:* – *detailed calculation of relevant costs by filling in the financial model summary inputs, CAPEX inputs, RC inputs, to be submitted as part of the financial information file using the required template*

Example, not to be completed

– *cost efficiency calculation to be submitted as part of the financial information file using the required template* – *the maximum amount of the requested Innovation Fund grant, as part of the financial information file (maximum grant amount cannot exceed 60% of the relevant costs)* *Explain how the relevant costs are calculated using the Guidance on the relevant cost methodology and any underlying assumptions used.* *If you use the reference plant calculation methodology (Option 2 in the Guidance on the relevant cost methodology), explain* – *how you meet the conditions for the methodology set out in the guidance* – *why you chose this methodology.* ***Note:*** *The requested EU grant should be consistent with the relevant cost calculation.*
Insert text

#§FIN-MGT-FM§#

6. BONUS POINTS

Bonus points *Where relevant, address one or multiple bonus points indicated in section 9 of the Call document. Clearly substantiate your claims and make reference to other relevant parts of the proposal.*
Insert text and refer to the relevant text of the proposal annexes/supporting documents

Example, not to be completed

#@WRK-PLA-WP@#

7. WORKPLAN, WORK PACKAGES, ACTIVITIES, MILESTONES, DELIVERABLES AND TIMING

7.1 Work plan

Work plan (overview of work packages, milestones and deliverables)

Provide a brief description of the overall structure of the work plan (list of work packages or graphical presentation (Pert chart or similar)).

List the work packages, their duration (from Month YX to month YX, relative to the starting date of the Innovation Fund project, e.g., Month 01 is the starting month of the project, etc.), and related deliverables and milestones for each work package below. These should be consistent with the detailed work package descriptions in section 9.2.

More work packages, deliverables and milestones can be added by adding rows to the table. Add to each milestone the means of verification of its achievement.

Work package	**Duration**	**Deliverable** (continuous numbering linked to WP)	**Milestones** (continuous numbering not linked to WP) and their means of their verification
Work package 1: [name of the work package]	YX - YX	D1.1, D1.2 ….	MS1, MS2 ……
Work package 2: [name of the work package]	YX - YX	D2.1, D2.2 …..	MSX, MSX+1 …….
…			

7.2 Work packages, activities, resources and timing

WORK PACKAGES

Work packages

This section gives a detailed description of the project activities.

*Group your activities into work packages. **A work package means a major sub-division of the project**. For each work package, enter an objective (expected outcome) and list the activities, milestones and deliverables that belong to it. The grouping should be logical and guided by identifiable outputs.*

Please respect the following set-up:

- *your project should include the following sequential work packages (mandatory):*
  - *WP1 – Up to Financial Close*
  - *WP2 – Between Financial Close and Entry into Operation*

Example, not to be completed

- *for all (except NZT GENERAL-SSP and PILOTS topics): WP3 – WP7 – Year [1, 2, 3, …] of Operation (annual reporting during the operation phase)*
- *for NZT GENERAL-SSP and PILOTS topics: WP3 – WP5 – Year [1, 2, 3] of Operation (annual reporting during the operation phase)*

– *you may define additional work packages by subdividing the above mandatory work packages (e.g. subdivide WP1 Activities prior to Financial Close into two separate WPs: a WP for completion of FEED study or for exploration of the geothermal reservoir, and a WP for financial close, or by subdividing the WP2 Activities between Financial Close and Entry into Operation into more WPs for the construction phase). Please ensure the correct progressive numbering of the work packages and that 3/5 work packages are included for the annual reporting during the operation phase.*

You can create as many work packages as needed by copying and adjusting the tables below.

As payments of the grant will be on a lump-sum basis when work packages are completed (prior to entry into operation) and also based on verified greenhouse gas reductions (after entry into operation), you must conclude each work package with a financial reporting milestone specific to that work package. The conclusion of each work package and the reaching of its related financing reporting milestone will open the right to the corresponding lump-sum payment. You must ensure that the ***budget for each work package including the expected allocation of the lump-sum contribution is proportional to the activities and effort covered by that work package.***

⚠ *Ensure consistency with the detailed budget table/relevant cost calculator (financial information file)*

Objectives

List the specific objectives to which the work package is linked.

Activities and division of work (WP description)

Provide a concise overview of the work (planned tasks). Be specific and give a short name and number for each task. For WP1, please also provide an overview of the documents which are typically needed before financial close (for instance signed credit facility agreements, contracts with project stakeholders (e.g. construction, offtake, O&M), FEED study, permit documents, due diligence reports, insurance documents, shareholder agreements and board resolutions).

Show who is participating in each task: Coordinator (COO), Beneficiaries (BEN), Affiliated Entities (AE), Associated Partners (AP), indicating ***in bold*** *the task leader.*

Note:

The Coordinator remains fully responsible for the coordination tasks, even if they are delegated to someone else. Coordinator tasks cannot be subcontracted.

Milestones and deliverables (outputs/outcomes)

Milestones *are the main control points in the project that help to chart progress.*

You can have several project milestones inside a work package; but you can have only one milestone at the end of the work package which triggers payments.

Each project should have the following minimum reporting milestones triggering payments:

- *financial close (milestone at the end of WP1)*
- *entry into operation (milestone at the end of WP2)*
- *annual reporting of GHG emission avoidance (milestone at the end of WP3 – WP7/WP3 – WP5 at the end of each annual reporting period during the operation phase of the project)*

Means of verification is the evidence in addition to the documents submitted as deliverables which are needed to demonstrate that a milestone has been reached.

Deliverables *are project outputs which are submitted to show project progress. Please refer to the main contracts and documents. Do not include minor sub-items, internal working papers, meeting minutes, etc. For each deliverable you must indicate a due month by when you commit to upload it in the Portal. The due month for the deliverable cannot fall outside the work package period and must be in line with the timeline provided below. Month 1 marks the start of the project and all deadlines should be related to this starting date.*

The labels used mean:

Example, not to be completed

Public — fully open (⚠ automatically posted online on the Project Results platforms)
Sensitive — limited under the conditions of the Grant Agreement
EU classified — RESTREINT-UE/EU-RESTRICTED, CONFIDENTIEL-UE/EU-CONFIDENTIAL, SECRET-UE/EU-SECRET under Decision 2015/444. For items classified under other rules (e.g. national or international organisation), please select the equivalent EU classification level.

Work Package 1

Work Package 1: Up to Financial Close			
Duration:	MX - MX	**Lead Beneficiary:**	1-Short name

Objectives

- Reaching financial close within the timeframe defined in section 6 of the Call document.

Activities and division of work (WP description)

Task No (continuous numbering linked to WP)	Task Name	Description	Participants		In-kind Contributions and Subcontracting (Yes/No and which)
			Name	Role (COO, BEN, AE, AP, OTHER)	
T1.1					n/a
T1.2					n/a
					n/a

Milestones and deliverables (outputs/outcomes)

Milestones: *Include as mandatory milestone the one triggering the payment at financial close. Other indicative milestones (depending on specificity of each project) are:*

- *project planning approved, with the following deliverables: FEED study finished; go to market strategy; supply/procurement strategy*

Example, not to be completed

- *project authorisation granted (including permits); with the following deliverables : relevant permits granted (environment, building, operation, public acceptance); land purchase or lease contract signed; final design approved at appropriate level*
- *main project contracting closed; with the following deliverables : signed PPA/off take contract; signed EPC document or construction contract[3]; signed long term service agreement; signed feedstock/supply contract[4]*
- *project financing means granted (final investment decision), with the following deliverables: final investment decision (FID) with signed financing agreements at appropriate level; signed credit facility with confirmation that all drawdown conditions are fulfilled; signed public funding agreement, signed shareholder agreement.*

Please adjust the milestones or include other relevant milestones and the corresponding means of verifications, relevant for your project.

***Deliverables**: Include the mandatory deliverables for this WP listed in section 10 of the Call document. Moreover, add any other essential document to verify the achievement of the financial close and other milestones; these in principle are project specific, however the following are expected to be included as deliverables: final version of the financial model; signed version of the consortium agreement (where applicable); essential financing agreements and project contracts (offtake/feedstock/construction/O&M).*

Other non-critical documents can be uploaded as means of verification of the related milestones (see below).

Milestone No (continuous numbering not linked to WP)	Milestone Name	Work Package No	Lead Beneficiary	Description	Due Date (month number)	Means of Verification
MS1		1				
MS2		1				
MS…	Financial Close	1		Milestone triggering payment		All the previous supporting documents and deliverables for this phase, as relevant for the project

Deliverable No (continuous numbering linked to WP)	Deliverable Name	Work Package No	Lead Beneficiary	Type	Dissemination Level	Due Date (month number)	Description (including format and language)
D1.1		1		[R — Document, report] [DEM —	[PU — Public] [SEN — Sensitive]		

[3] If not signed before financial close, applicants should provide at least a clear trajectory path for likely timing and cost as well as detailed procurement arrangements for construction works, materials and equipment necessary for the proper completion of the entire project. The construction contract should normally define a definitive project planning with penalties and a performance guarantee.

[4] The contract should normally define a penalty if the volumes /qualities are not delivered.

Example, not to be completed

				Demonstrator, pilot, prototype] [DEC —Websites, patent filings, videos, etc] [DATA — data sets, microdata, etc] [DMP — Data Management Plan] [ETHICS] [SECURITY] [OTHER]	[R-UE/EU-R — EU Classified] [C-UE/EU-C — EU Classified] [S-UE/EU-S — EU Classified]

Work Package 2

Work Package 2: From Financial Close to Entry into Operation			
Duration:	MX - MX	**Lead Beneficiary:**	1-Short name
Objectives			

Example, not to be completed

- Reaching entry into operation.

Activities and division of work (WP description)

Task No (continuous numbering linked to WP)	Task Name	Description	Participants		In-kind Contributions and Subcontracting (Yes/No and which)
			Name	Role (COO, BEN, AE, AP, OTHER)	
T2.1					n/a
T2.2					n/a
					n/a

Milestones and deliverables (outputs/outcomes)

Milestones*: Include as a mandatory milestone the entry into operation (milestone triggering payment). Other indicative milestones (depending on specificity of each project) are:*

- *site preparation, with relevant reports or evidence as deliverables*
- *construction, with relevant reports or evidence as deliverables*
- *pre-commissioning, with relevant reports or evidence as deliverables*
- *operation and maintenance, with relevant maintenance and operation agreement signed as deliverables*
- *commissioning, start-up and testing, with the following deliverables: commissioning protocol signed by all relevant parties, signed protocol stating the start-up date, procedure and test results; completion certificate.*

Please adjust the milestones or include other relevant milestones and the corresponding means of verifications, relevant for your project.

Deliverables*: Include the mandatory deliverables for this WP listed in section 10 of the Call document. Moreover, add any other essential deliverable suitable to report on the progress of the WP activities (e.g. operational readiness and completion certificate) and the achievement of the entry into operation.*

9. DECLARATIONS

Do No Significant Harm (DNSH)	YES/NO
We confirm that we will ensure that the project will comply with the 'do no significant harm' technical screening criteria (TSC) set out in Annex II to Delegated Regulations 2021/2139 and/or 2023/2486. We acknowledge and confirm that we will comply with these requirements throughout the project implementation and that in case of breach, we understand that the grant may be terminated and reduced or any other measure described in Chapter 5 of the Grant Agreement may be taken.	

Cumulation of funding/Double funding	
Information concerning other EU grants for this project ⚠ *Please note that there is a strict prohibition of double funding from the EU budget (except under EU Synergies actions).*	YES/NO
We confirm that to our best knowledge neither the project as a whole nor any parts of it have benefitted from any other EU grant *(including EU funding managed by authorities in EU Member States or other funding bodies, e.g. EU Regional Funds, EU Agricultural Funds, etc)*. If NO, explain and provide details.	
We confirm that to our best knowledge neither the project as a whole nor any parts of it are (nor will be) submitted for any other EU grant *(including EU funding managed by authorities in EU Member States or other funding bodies, e.g. EU Regional Funds, EU Agricultural Funds, etc)*. If NO, explain and provide details.	

Financial support to third parties (if applicable)
Not applicable.

PDA support
Proposals may be proposed for project development assistance (PDA) support from the European Investment Bank

Example, not to be completed

(EIB) as a result of the evaluation (see section 8 of the Call document). *In this case, your proposal (and all the project documentation which is submitted to us) would be shared with the EIB.*	
Do you agree that your proposal and the project documentation will be provided to the EIB for their PDA assessment?	*[*YES*] [*NO*]*

National funding schemes (also called 'grants as a service') *Proposals may be proposed for national schemes as a result of the EU evaluation.* *This means that your proposal (and all the project documentation which is submitted to us) would be shared with the national authorities of the country where the project takes place.*	
Do you wish to be proposed for a national funding scheme? ⚠ Please note that, in case you agree, this will also be considered as explicit consent to the sharing of your proposal (including Part B and all annexes and the evaluation summary report) with the competent national granting authority.	*[*YES*] [*NO*]*

Information to Member States *Following call closure, information on the project participants, their projects, their contact details, the amount of requested Innovation Fund support and, where relevant, envisaged dates of financial close and entry into operation may be shared with the Member States of the country(ies) where the project is located, in order to facilitate Member States' coordination of the support for projects.*	
Do you agree on behalf of the project consortium that this information is shared with the Member States?	*[*YES*] [*NO*]*
